

## How To Tie A Windsor Knot

[www.134.org.uk](http://www.134.org.uk)

1. Drape the tie around the neck, crossing the larger end over the smaller end. The smaller end should be shorter.
2. Instead of simply curling the larger end completely around the smaller end and then knotting, curl the larger end around and behind, then pull it up and over the neck loop.
3. Once the larger end is over the neck loop, curl it behind, the smaller end again.
4. From behind, curl it up and over the neck loop again and pull down.
5. Cross the larger end over the smaller end horizontally.
6. From the horizontal position, curl the larger end under the neck loop and pull up.
7. Tuck the larger end down and into the knot you've created.
8. Pull the larger end down until the knot is tightened and secured in a comfortable position.
